

Skill Evaluation Certificate (Knowledge) – Fibre Optics Installation

Course Overview

This course is designed for all workers with no prior experience in fibre optics to learn about the basics of fibre optics installation for high rise building. The 3 days course includes theory and practical components to impart knowledge and skill of fibre optics cabling. Successful completion of the test will lead to a SEC (K) certification.

Course Syllabus

- Learn about fibre optics cable, fibre joint and network design
- Perform fibre optics testing and fusion splicing
- Master basic troubleshooting skills to rectify high loss
- Practical hands-on session to install fibre optics

Course Details

<i>Duration</i>	3 days training + 1 day test
<i>Venue</i>	26 Woodlands Industrial Park E1 Singapore 757744
